The Ritual

Concentrate your intention on charging each step For as long as you Feel necessary.

Prepare the charcoal disk by lighting it and placing it in a heat-resistant container. Light the sage smudge stick and gently swirl the smoke around the items you intend to cleanse and the energy of your space. Anoint the candle with bergamot oil; once ready, place it in the centre of your crystals and ignite it.

Add a pinch of patchouli and Dill seeds to the charcoal disk, which should have a grey colour, indicating its readiness For use. Using your clear quartz crystal, cleanse with the smoke From the incense and then meditate with the crystal For a period of time. This practice aids in clearing your mind and enhancing the clarity of your intention.

Draw your sigil on the bay leaf using a marker pen, taking time to meditate on your intention or simply writing it down. Using tongs, light the bay leaf on the Flame of the candle and allow it to burn while reciting your intention. Place it in the heat-resistant container and extinguish it.
